CONVENIENCE STORES

What we do

Convenience store operations have become more complex over the years. Increase in square footage, food and beverage offerings and more traffic due to an increase in customers foot traffic, keeping up with reactive maintenance and preventative maintenance has stretched teams thin. BFC Solutions understands the needs of our convenience store partners offering planned preventative maintenance programs that keep your team on top of store issues so you can ensure your customers experience a clean, fully stocked store with no maintenance issues.

Our Partners

Unlocking Value

- Reduce operational complexity
- Nationwide self-performing service
- Focused on sustainability

Proven Practices

With the increase in energy, labor, and materials we are seeing operational costs rising. We also know that in a single store repairs and maintenance can cost as much as \$38,000 per year. Having a plan for preventative maintenance can help you reign in costs to help your bottom line

OUR IMPACT ON **CONVENIENCE STORES**

Convenience stores are challenged with keeping inventory in stock to meet customer needs. BFC Solutions will warehouse your air filters, belts, and more so that your stockroom can have more space for inventory for your loyal customers.

OUR GOAL **SUSTAINABILITY**

We strive to reduce waste, both in our workplace and in our products. In the workplace, we created dedicated recycling areas where employees can separate compostable waste and recycle. Our products are also sustainable. Our patented PleatLink™ filters completely eliminate cardboard waste.
