

HVAC Planned Preventative
Maintenance

GROCERY STORES

What we do

The average grocery store's net profit after taxes is 1%. BFC Solutions can help you protect your profit margins and reduce your reactive maintenance through our planned preventative maintenance programs. Our trained technicians focus on maintaining your facilities so your grocery staff can provide your customers with excellent service.

Our Partners

Unlocking Value

- Reduce operational complexity
- Nationwide self-performing service
- Focused on sustainability

Proven Practices

With the increase in energy, labor, and materials we are seeing operational costs rising. We also know that in a single store repairs and maintenance can cost as much as \$38,000 per year. Having a plan for preventative maintenance can help you reign in costs to help your bottom line

OUR IMPACT ON **GROCERY STORES**

BFC Solutions understands that supermarkets consume the greatest amount of electricity per square foot of any building type in the United States and represent 5% of total U.S. commercial building primary energy use (EIA 2005). Our customized HVAC and refrigeration services for grocery stores allow you to focus on your business while we work to improve efficiency and guest satisfaction through planned preventative maintenance.

OUR GOAL **SUSTAINABILITY**

We strive to reduce waste, both in our workplace and in our products. In the workplace, we created dedicated recycling areas where employees can separate compostable waste and recycle. Our products are also sustainable. Our patented PleatLink™ filters completely eliminate cardboard waste.
